Re: Wilbur Hot Spring Conditional Waiver R5-2013-XXXX

Dear Mr. Izzo:

I would like to make the following comment on behalf of Dr. Richard Miller and most of all, if not all of the current holders of fee simple property and other rights in the area of Wilbur Hot Springs and the Sulphur Creek Basin. Dr. Miller and our company has had no involvement in the mining and exploration that may have caused any damage in the past two centuries, in fact most of was were not even alive when any damage may have occurred.

In the case of Dr. Miller, he has been a been an absolute protector of the environment of the area in and around Wilbur Hot Springs, and one could not ask for a better Stewart of the environment.

In the case of our company, we only own certain retained right to geothermal and other retained right that we acquired from Bailey Minerals Corporation and Filiatra, Inc., and we do not own any taxable fee simple surface estate in the entire area.

There is no clear evidence that any of the pollution that is occurring in the Wilbur Hot Spring and Sulphur Creek Area is from anything other than naturally occurring sources, and that even though some old mine workings and dumps occur in the area that they are having any effect on the water qualities of Suphur Creek what-so-ever.

We do not only feel that the present order should waived, but that it should have never been issued in the first place, and that it should removed from the record with and apology being made by the Board to all of the parties that were listed in that order.

Sincerely,

A handwritten signature in black ink, appearing to read "John M. Torok", with a stylized flourish extending from the end of the name.

President

Geonomics, Inc.
